Construct Week Project 🔗

Masai School

Project participation certificate for construct week project on the topic of Manual testing of a website name Big Commerce.

Jitendra Kumar

SDET/QA

PROFESSIONAL SUMMARY

Professional Summary: Innovative Software Tester with a passion for leveraging technology to solve real-world problems. Possesses strong skills in software development in testing, with experience in collaboration and teamwork. Excels at quickly adapting to new technologies and methodologies, ensuring high-quality software delivery.

PROJECTS

1. Automation Testing for Automation Test | Store Web App Using Cypress

JavaScript | Cypress

- Designed and executed automated test scripts using Cypress, focusing on core website functionalities like login, product search, and checkout.
- Utilized the Page Object Model (POM) to enhance test reusability and maintainability, making tests cleaner and more organized.

2. Manual Testing for BigCommerce Web App

Multiple browser Response

- Performed end-to-end manual testing to verify website functionality, usability, and responsiveness across different devices and browsers.
- Documented test scenarios, executed test cases, and reported bugs to provide a thorough evaluation of the user experience.

WORK EXPERIENCE

Manomav Engineers Private Limited

Civil Engineer (Quantity Surveyor)

August 2023 – July 2024

Job responsibilities:

- Applied strong analytical skills to evaluate project metrics and outcomes, ensuring accurate reporting.
- Collaborated with multidisciplinary team to ensure project specifications and client requirements were met.
- Utilized problem-solving skills to resolve discrepancies in planning and execution.
